Any deficiency statement ending with an asterisk (\*) denotes a deficiency which the institution may be excused from correcting providing it is determined that other safeguards provide sufficient protection to the patients. (See instructions.) Except for nursing homes, the findings stated above are disclosable 90 days following the date of survey whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are disclosable 14 days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is requisite to continued program participation.

Written records of maintenance and testing are maintained and readily available. EES electrical panels and circuits are marked, readily identifiable, and separate from normal power circuits. Minimizing the possibility of damage of the emergency power source is a design consideration for new installations. 6.4.4, 6.5.4, 6.6.4 (NFPA 99), NFPA 110, NFPA 111, 700.10 (NFPA 70) This RECUIREMENT is not met as evidenced by: Based on documentation review and interview on 7/30/19 in the presence of facility management, it was determined that the facility falled to inspect the emergency generator weekly for 24 of 52 weeks and failed to conduct 4 of the required 12 load tests on the emergency generator Annually in accordance with NFPA 99.  This deficient practice was evidenced by the following:  1. A review of the facility's emergency generator log for the previous 12 months revealed that the there were no entries for weekly inspections from 1/28/19 to 7/12/19 (24 of 52 weeks).  2. The review of the generator log also revealed that the facility did not exercise the emergency generator between these same dates, 1/28/19 to 7/12/19. This resulted in the facility conducting only 8 of the 12 required load tests for the previous 12 months.			315298	B. WING	i		08/	06/2019

					A. Monitoring the continued effectiveness of the systemic change. The Director of Maintenance will assign staff to inspect the emergency generative weekly. The Director of Maintenance was responsible for monitoring the week inspection of the emergency generator located in the maintenance office. The monitoring of this log will ensure that the emergency generator is being inspected weekly for compliance. The Director of Maintenance will submit a monthly reports to be reviewed by the Administrator at QAPI meetings monthly, for 6 months, ensure solutions are sustained the maintenance department will also run to monthly load test of the generator. This monthly load test will be logged and the Maintenance Director will review the logged monthly. The monthly log of the load to will be reviewed by the Administrator at the QAPI meeting monthly, for 6 months. Each deficiency is assigned only completion date. The compliance date for this POC is August 20, 2019.	or vill ly log e d f ort the To he s e g g sest t is.
