Any deficiency statement ending with an asterisk (\*) denotes a deficiency which the institution may be excused from correcting providing it is determined that other safeguards provide sufficient protection to the patients. (See instructions.) Except for nursing homes, the findings stated above are disclosable 90 days following the date of survey whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are disclosable 14 days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is requisite to continued program participation.

F 730	Continued From page 12 During an interview with the surveyor on 8/20/19 at 9:04 AM, the Director of Nursing (DON) stated it was "important" for the CNAs to have their mandatory in-service training for educational purposes, to maintain their certification and to keep in compliance with up to date practices that would enable them to provide care to the residents.  During a follow up interview with the surveyor on 8/21/19 at 9:19 AM, the DON acknowledged that the six CNAs did not have the required 12 hours of annual, mandatory in-services. The DON further stated that she would have to work on a plan because there was no time, content or constructive manner to quantify the training provided to the CNAs.	F 730

F 812	Continued From page 21  23. There was a three door reach in refrigerator that had four white fan covers with a brownish/grayish fuzzy matter on them. The FSD wiped them with a paper towel and stated it was dust.  24. There was an opened five-pound tub of cottage cheese in the refrigerator with an open date of 7/26. The FSD stated that once opened that should have been discarded after seven days. The FSD removed and discarded it.  25. The entire back of the ice machine bin had a blackish substance that the FSD was able to wipe off with a paper towel. In addition, there was a heavy build up of a brownish/grayish fuzzy substance on the ice machine vent. The FSD stated it looked like dust and dirt.  26. DA #1 was again observed wearing gloves as he loaded dirty dishware into the dish machine. DA #1 then retrieved clean dishware from the dish machine without removing his gloves, washing his hands and reapplying clean gloves.  27. There was a fan cover and two suspended grates labeled "RD FRESH" in the walk-in refrigerator that had a heavy build up of a brownish/grayish fuzzy substance. The FSD wiped these areas with a paper towel and stated it was dust.  28. In the walk-in refrigerator, there were a dozen raw eggs stored directly on top of a case of liquid whole pasteurized eggs. The FSD removed it and stated it should not have been stored that way because it could cross contaminate salmonella.	F 812	hands and reapplying new gloves. NHA re-educated Director of Food service on the need for all dietary staff to follow that practice. 4. The Registered Dietician will audit the dietary staff to assure that two people operate the dish machine and are maintaining proper sanitation. Audits will be completed 4 days a week x 2 weeks then weekly x 3 months. Registered Dietician will report results during the monthly QAPI meeting. The QAPI is attend by the NHA, DON and Medical Director.  F812 S/S F FOOD PROCUREMENT, STORE/PREPARE/SERVE-SANITARY 6. The dish machine temperatures were observed to be 150 degrees F for the wash cycle and 160 degrees F for the rinse cycle. The temperature needs to be 160 degrees F for the wash cycle and 180 f for the rinse cycle. 1. No residents were affected by this deficient practice. Meals were served on paper products. The dishes were sanitized using the 3 compartment sink soaking in a minimum of 200ppm for a minimum of 60 seconds after running the dishes through the dish machine cycle. The dietary aid was immediately re-educated on the need for the dish machine temperature of the wash cycle to be at 160 degrees F and the rinse cycle at 180 degrees F, and if not, to sanitize in the 3 compartment sink soaking in a minimum of 200pm solution for a minimum of 60 seconds.

F 812	<p>Continued From page 24 out.</p> <p>During an interview with the surveyors on 8/14/19 at 1:00 PM, the RD stated that she performed sanitation audits to ensure that the kitchen was functioning "in a sanitary manner and following regulation." She stated that she recorded things that were a problem and things that had not yet been resolved. The RD stated she gave a copy of her audits to the FSD, the Administrator, the Director of Nursing and the Maintenance Director; however, no one reports back to her to ensure the problem areas were resolved. She further stated that she does not follow up until the following audit a month later. The RD stated she did not recall when she performed the July audit, as none of the audits provided to the surveyors were dated. The RD could not state how long a container of cottage cheese would have been good for once opened. In addition, she could not speak to the proper water temperature when thawing food under running water. She stated that raw foods needed to be stored below cooked foods but was unaware of the order in which raw foods should be stored. The RD stated that raw eggs should not have been stored over liquid pasteurized eggs. She further stated that some of the things she checks in the kitchen are that the staff are using proper thawing methods, that all spices are dated and labeled, and that the back of the stove, refrigerators and ice machine are clean.</p> <p>During an interview with the surveyor on 8/15/19 at 9:37 AM, the FSD stated the dish machine company returned to service the dish machine and stated that the rinse cycle wasn't reaching 180 degrees F due to faulty elements in the booster.</p>	F 812	<p>be completed 4 days a week x 2 weeks then weekly x 3 months. F 880	<p>Continued From page 40</p> <p>delivery for 1 of 2 residents reviewed for [REDACTED] use (Resident #15).</p> <p>This deficient practices were evidenced by the following:</p> <p>1. On 8/20/19 at 9:00 AM, the surveyor reviewed the facility Infection Control Policies and Procedures (ICPP) manual which revealed an outline that included but was not limited to the "Scope of Infection Control Program," not dated; the "Role of the Infection Control Coordinator," not dated; the "Agenda" for the Infection Control Meetings, not dated; and the "Objectives" of the Infection Control Committee, not dated. The ICPP manual contained 51 different disease processes and their infection control measures with the most current "updated" and/or "reviewed" listed as November 2008.</p> <p>During an interview with the surveyor on 8/21/19 at 9:11 AM, the Director of Nursing (DON) stated the purpose of reviewing and updating the ICPP was to keep up with the most effective practices for the well being of the residents and staff. The DON further stated that no policies have been reviewed or updated that she had been aware of. The facility was unable to provide documentation of an annual review of the ICPP manual.</p> <p>During an interview with the surveyor on 8/21/19 at 11:32 AM, the Regional Registered Nurse (RN) stated the policies and procedures should be reviewed annually for updates and that if there had been any updated policies or procedures for the ICPP manual that they would be in the manual, and if they were not in there, the facility did not have them. Additionally, the Regional RN stated the ICPP manual was important because</p>	F 880	<p>4 identified residents were instructed on preparing a clean environment during and after [REDACTED] care.</p> <p>3. The DON stated that agency staff would also be oriented to facility policies on handwashing. The DON stated that she believed handwashing should be 20-25 seconds but was not sure of the facility policy and would need to check the amount of time.</p> <p>Review of the Hand Hygiene policy, dated 3/19/19, revealed "Employees must wash their hands for at least twenty (20) seconds using antimicrobial or non-antimicrobial soap and water... ."</p> <p>On 8/15/19 at 8:27 AM, the surveyor observed LPN #4 administer medications. The LPN did not perform hand hygiene before or after administering medications to the first resident.</p> <p>On 8/15/19 at 8:39 AM, the surveyor observed LPN #4 administer medications to a second resident. The LPN did not perform hand hygiene prior to preparing the resident's medications. After administering the medications, the LPN washed her hands for 60 seconds.</p> <p>During an interview with the surveyor on 8/15/19 at 8:54 AM, LPN #4 stated that handwashing is performed before starting the medication pass, hand sanitizer is used in-between administering medications to different residents, and handwashing is performed after every third resident. When asked if the LPN followed that procedure when administering medications in the</p>	F 880	5 times a week x 2 weeks then weekly x 3 months. The DON will report results during the monthly QAPI meeting. The QAPI is attended by the NHA, DON and Medical Director.
